Save graphics as either TIFF or TARGAS. Both will work on Chyron and Stillstore. Upon import into Stillstore, you will be prompted to resize the image to 720x486. SELECT "YES TO ALL" The images will appear squeezed in the program, but will show up full screen 16:9 when used through the TD board. Be sure the images are not compressed when saving them if you are to use alpha channels, as this may affect the integrity of them.
